

HERPASUR

SECOVISA, since its establishment in 1987, has been featured by its continuing desire to overcome and improvement, has everything what is necessary to reach the highest levels in different areas of the company.

This company has all the experience and professionalism in the industry sector, accumulated over 35 years by its founders, allowing us to provide a specialized service to our customers, from supplying a spare part, machine, accessory, etc. to performing a repair or a „turnkey” installation execution .

It is located on a plot of 3500 m2 in Jerez Business Park with a structure formed by Offices (technical, administration, sales department) , Warehouse, Exhibition, Workshop and mobile equipment that allows us to develop our work in the homes of our customers with the best quality and guarantee.

SECOVISA in 1989 created HERPASUR company dedicated to the manufacture of stainless steel tanks, which together with the official machinery distribution of other prestigious companies allows us to run „turnkey” facilities, based on studies conducted by our own technical department, or in collaboration with engineers specialized in different industrial sectors:

FOOD SECTOR

CHEMICAL INDUSTRY

DECORATION

WATER TREATMENT

WASTEWATER TREATMENT

PHARMACEUTICAL SECTOR

AUTOMATION

SPARE PARTS AND ACCESORIES

CUSTOM WORKS

HERPASUR

HERPASUR designs and manufactures stainless steel tanks for different industries: oiler, wine and distillation, food, chemical and bio-fuels. Herpasur has been for nearly half a century creating, manufacturing and patenting their tanks, reservoirs and complementary machines in stainless steel.

With an area of 12,000 m², HERPASUR since its establishment and together with its parent company SECOVISA, have teamed up to develop the activities of Research and Development. This is based primarily on the study and collection of industrial processes already applied and approved in other sectors, analyzing their advantages to be applied in the new field, after a series of tests and changes for their new adaptation.

HERPASUR SA manufactures only upon order and can adapt the sizes of deposits, both in height and diameter to the customer's needs.

OUR FACILITIES ARE EQUIPPED WITH THE LATEST EQUIPMENT AND THE BEST TECHNIQUE FOR CONTINUOUS AND IN CHAIN PRODUCTION, CREATING SOLUTIONS FOR VARIOUS INDUSTRIAL SECTORS:

FOOD SECTOR

The experience of the technical and productive team of Secovisa and Herpasur makes us the pioneers in the construction of tanks for all sectors of the food industry, such as silos for all kinds of fats, juices, oils, beer, preserves, wines and alcohols.

CHEMICAL INDUSTRY

Production of reactors for chemical industry. Mixers and storage for soap industry. Heating containers for gas liquefaction.

BIOFUELS INDUSTRY

We make tanks to contain any type of liquid. They can be made in any finish, being appropriate to the demands of our customers.

OUR MAIN PRODUCTS

FERMENTATION TANKS

We cover the fields of controlled fermentation of red, white and sparkling wines. We give the deposits of all the necessary elements to control the food production process.

IN SITU TANKS

We perform a dynamic or static filtration using decanters. The goal is to eliminate most waste and water after grinding and before final warehouse storage.

STORAGE TANKS

With different bottoms, flat or conical, on wheels or legs. We execute projects and complete plants for the receiving, storage and processing of food products.

SETTLING TANKS FOR OIL SECTOR

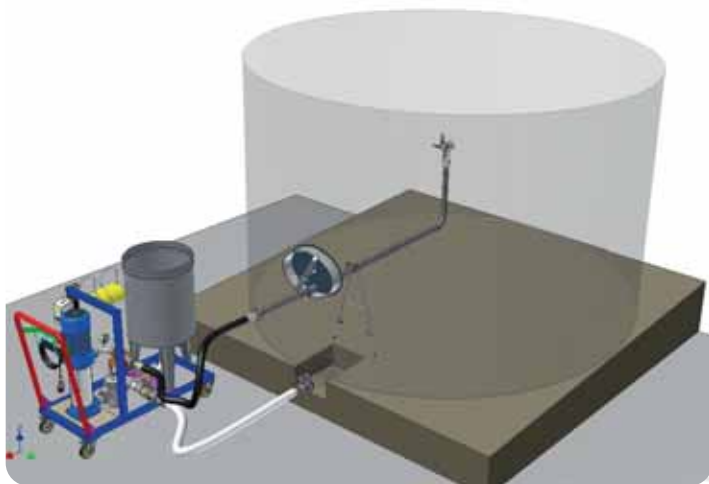

We manufacture tanks that for their capacity can not be transported. We perform the entire work in your facilities.

DESIGNS, MANUFACTURES AND INSTALLS:

CUSTOM-MADE EQUIPMENT

- Tank cleaning equipment.
- Counter equipment
- Turbid extraction equipment.
- Take out and spray equipment
- Mixers

MACHINERY SALES

SECOVISA has Andalucía official distributions of a series of prestigious brands.

PROCESS AUTOMATION

We automate full manufacturing processes by software performed on a PC.

SISTEMA SAEEDI

PIPING AND BRIDGES INSTALLATION

Conception, Design, assembly and installation of pipes for liquids conduction, as well as walkways and stairs of stainless steel for communication in height of the different components of a plant or tank.
